A Touchstone Energy® Cooperative 

Working with Local Legislators

January 2022

“All politics is local.” This observation by the late Thomas P. “Tip” O’Neill, Jr., former Speaker of the House of Representatives, means that even national politics have a local impact, and people care most about issues that directly affect them. Indirectly, this famous adage underscores the importance and value of local politics.

At Central New Mexico Electric Cooperative, we think it’s critical to develop and cultivate relationships with local legislators because they craft, introduce and vote on legislation that impacts the local business climate, the environment and quality of life for our community. That is why we work closely with our local elected officials. After all, our purpose is to provide safe, reliable, affordable energy, but our mission is to help our community thrive.

CNMEC is a local business that powers economic development and prosperity for our region. As a cooperative, we have deep roots here, and we listen closely to our members to better understand the needs of the community. Our leadership, board members and employees live and work right here in the community we serve.

We strive to be an advocate for our community, ensuring that local legislators know, understand and act on the issues that are important to our area.

Providing industry guidance and expertise

As a practical matter, we recognize that most legislators are “generalists,” yet they vote on a wide range of issues. Their expertise may not include the changing energy industry, which is why CNMEC along with the NMRECA, New Mexico Rural Electric Cooperatives Association provides guidance and expertise from subject matter experts who’ve been in the energy industry for many years.

Today’s energy landscape is an increasingly complex topic covering not only the traditional engineering and vegetation management aspects of the industry, but also encompasses technology, cybersecurity, the electrification of the transportation sector and more.

Our experts provide briefings and backgrounders to legislators, committees, and staff, and we offer expert testimony for hearings and other legislative or regulatory meetings or gatherings. And because we’re involved in economic development and we know local community leaders, we can provide insight on how issues and policies under discussion might impact our region.

Representing your best interests

We strive to be a trusted resource on energy issues. Because of our deep roots in the community, we have a firm understanding of local issues and needs. We will continue looking after the long-term interests of our consumer-members. This means we are able to cultivate and foster positive, productive relationships with legislators who know and trust us, because we’re advocating on behalf of the community we serve.

We’re proud to power your life and bring good things to the community. We hope you’ll continue to advise CNMEC on matters of importance so we can continue to advocate on your behalf and improve quality of life for all.

CNMEC Education Foundation Scholarship

CNMEC is Now Accepting Scholarship Applications!

Scholarship applications can be obtained through your school guidance counselor or may be picked up at our Moriarty or Mountainair office. Applications may also be found on the CNMEC website at www.cnmec.org

Scholarship Deadline is January 20, 2022

CNMEC

CNMEC Host's Transformer Training School

In December CNMEC hosted the OAEC & NMRESIF Transformer Training School, where students consisting of Journeyman Linemen, Apprentices and Line Formen from nine electric cooperatives across the state were in attendance. Courses consisted of in-class instruction as well as practical hands-on learning and troubleshooting. Instructors included: Cade Sandifer of OAEC, Tanner Dunlap of AOEC, Josh Stice of Tri-State G&T, and Cayton Barber of RCEC.

Christmas Light Parade 2021

CNMEC crews join our local communities in lighting up the night at the Corona and Mountainair Christmas Light Parades.

Energy Efficiency Tip of the Month

Maximize your heating system's performance by inspecting, cleaning or replacing air filters once a month or as needed to reduce energy costs and prevent potential damage to your system.

Make sure radiators, baseboard heaters and warm-air registers aren't blocked so air can flow freely.
